Bowleven plc ('Bowleven' or 'the Company')

### **Bomono Drilling Update**

#### **Moambe exploration well, Bomono Permit, Cameroon**

Bowleven, the Africa focused oil and gas exploration group traded on AIM, is pleased to announce that drilling operations have commenced on the Moambe exploration well on the Bomono Permit, onshore Cameroon.

Moambe, the second well in a two well programme, is located just over two kilometres east of the first well, Zingana, and is a previously undrilled Paleocene (Tertiary) three-way dip fault block targeting multiple sands. The well will be drilled to an estimated target depth of circa 1,620 metres MD.

Further petrophysical evaluation on the Zingana discovery well is continuing and as planned the well has been suspended to enable future re-entry and testing.

As previously announced, the intention is to drill, log and evaluate both wells prior to determining any testing plan.

Further update announcements on drilling activities will be made in due course, as appropriate.
